

# **ATWINC15X0**

## **Wi-Fi Add-on Component**

Release Notes

All information contained in these materials, including products and product specifications, represents information on the product at the time of publication and is subject to change by RELOC s.r.l. without notice.

# Outline

- 1. Introduction ..... 6
  - 1.1. Description ..... 6
- 2. Synergy Wi-Fi framework add-on release notes ..... 6
  - 2.1. ATWINC15X0 Wi-Fi add-on component release 1.2.0-b.15 ..... 6
    - 2.1.1 Release information ..... 6
    - 2.1.2 Release package supported APIs and functionalities ..... 6
  - 2.2. ATWINC15X0 Wi-Fi add-on component release 1.2.0-b.16 ..... 7
    - 2.2.1 Release information ..... 7
    - 2.2.2 Release package supported APIs and functionalities ..... 7
  - 2.3. ATWINC15X0 Wi-Fi add-on component release 1.2.0-b.17 ..... 7
    - 2.3.1 Release information ..... 7
    - 2.3.2 Release package supported APIs and functionalities ..... 8
  - 2.4. ATWINC15X0 Wi-Fi add-on component release 1.2.0 ..... 8
    - 2.4.1 Release information ..... 8
    - 2.4.2 Release package supported APIs and functionalities ..... 9
  - 2.5. ATWINC15X0 Wi-Fi add-on component release 1.3.0 ..... 9
    - 2.5.1 Release information ..... 9
    - 2.5.2 Release package supported APIs and functionalities ..... 9
  - 2.6. ATWINC15X0 Wi-Fi add-on component release 1.3.2 ..... 10
    - 2.6.1 Release information ..... 10
    - 2.6.2 Release package supported APIs and functionalities ..... 10
  - 2.7. ATWINC15X0 Wi-Fi add-on component release 1.3.2-update1 ..... 11
    - 2.7.1 Release information ..... 11
    - 2.7.2 Release package supported APIs and functionalities ..... 11
  - 2.8. ATWINC15X0 Wi-Fi add-on component release 1.3.2-update2 ..... 12
    - 2.8.1 Release information ..... 12
    - 2.8.2 Release package supported APIs and functionalities ..... 12
  - 2.9. ATWINC15X0 Wi-Fi add-on component release 1.3.2-update3 ..... 13
    - 2.9.1 Release information ..... 13
    - 2.9.2 Release package supported APIs and functionalities ..... 13
  - 2.10. ATWINC15X0 Wi-Fi add-on component release 1.3.2-update4 ..... 14
    - 2.10.1 Release information ..... 14
    - 2.10.2 Release package supported APIs and functionalities ..... 14
  - 2.11. ATWINC15X0 Wi-Fi add-on component release 1.4.0 ..... 15

- 2.11.1 Release information ..... 15
- 2.11.2 Release package supported APIs and functionalities ..... 15
- 2.12. ATWINC15X0 Wi-Fi add-on component release 1.4.0-update2 ..... 16
  - 2.12.1 Release information ..... 16
  - 2.12.2 Release package supported APIs and functionalities ..... 16
- 2.13. ATWINC15X0 Wi-Fi add-on component release 1.5.0-rc.1 ..... 17
  - 2.13.1 Release information ..... 17
  - 2.13.2 Release package supported APIs and functionalities ..... 17
- 2.14. ATWINC15X0 Wi-Fi add-on component release 1.5.0 ..... 18
  - 2.14.1 Release information ..... 18
  - 2.14.2 Release package supported APIs and functionalities ..... 18
- 2.15. ATWINC15X0 Wi-Fi add-on component release 1.5.3 ..... 19
  - 2.15.1 Release information ..... 19
  - 2.15.2 Release package supported APIs and functionalities ..... 19
- 2.16. ATWINC15X0 Wi-Fi add-on component release 1.5.3-update1 ..... 20
  - 2.16.1 Release information ..... 20
  - 2.16.2 Release package supported APIs and functionalities ..... 20
- 2.17. ATWINC15X0 Wi-Fi add-on component release 1.6.0 ..... 21
  - 2.17.1 Release information ..... 21
  - 2.17.2 Release package supported APIs and functionalities ..... 21
- 2.18. ATWINC15X0 Wi-Fi add-on component release 1.6.2 ..... 22
  - 2.18.1 Release information ..... 22
  - 2.18.2 Release package supported APIs and functionalities ..... 22
- 2.19. ATWINC15X0 Wi-Fi add-on component release 1.7.0 ..... 23
  - 2.19.1 Release information ..... 23
  - 2.19.2 Release package supported APIs and functionalities ..... 23

# 1. Introduction

## 1.1. Description

This document describes the release notes for the SSP WiFi Add-On Framework software for ATWINC1500 module.

## 2. Synergy Wi-Fi framework add-on release notes

### 2.1. ATWINC15X0 Wi-Fi add-on component release 1.2.0-b.15

#### 2.1.1 Release information

|   |              |
|---|--------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.2.0-b.15   |
| Compatible with Wi-Fi Framework Add-on versions | 1.0.0-b.3    |
| Compatible with SSP versions                    | 1.2.0        |
| Release Date                                    | May 12, 2017 |

#### 2.1.2 Release package supported APIs and functionalities

##### 2.1.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

|                           |               |
|---------------------------|---------------|
| - open                    | supported     |
| - close                   | NOT supported |
| - multicastListAdd        | NOT supported |
| - multicastListDelete     | NOT supported |
| - statisticsGet           | supported     |
| - transmit                | supported     |
| - provisioningSet         | supported     |
| o Station mode            | supported     |
| o AP mode                 | NOT supported |
| - provisioningGet         | supported     |
| - infoGet                 | supported     |
| - scan                    | NOT supported |
| - accessControlListAdd    | NOT supported |
| - accessControlListDelete | NOT supported |
| - macAddressGet           | NOT supported |
| - macAddressSet           | supported     |
| - versionGet              | supported     |

##### Additional notes

Wi-Fi module SSP add-on instantiates an internal thread required for low-level Wi-Fi communication management. Internal thread stack is allocated by means of a static buffer.

### 2.1.2.2 BSD socket API

Not supported.

## 2.2. ATWINC15X0 Wi-Fi add-on component release 1.2.0-b.16

### 2.2.1 Release information

|   |              |
|---|--------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.2.0-b.16   |
| Compatible with Wi-Fi Framework Add-on versions | 1.0.0-b.3    |
| Compatible with SSP versions                    | 1.2.0        |
| Release Date                                    | May 15, 2017 |

### 2.2.2 Release package supported APIs and functionalities

#### 2.2.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

|                           |               |
|---------------------------|---------------|
| - open                    | supported     |
| - close                   | supported     |
| - multicastListAdd        | NOT supported |
| - multicastListDelete     | NOT supported |
| - statisticsGet           | supported     |
| - transmit                | supported     |
| - provisioningSet         | supported     |
| o Station mode            | supported     |
| o AP mode                 | NOT supported |
| - provisioningGet         | supported     |
| - infoGet                 | supported     |
| - scan                    | NOT supported |
| - accessControlListAdd    | NOT supported |
| - accessControlListDelete | NOT supported |
| - macAddressGet           | supported     |
| - macAddressSet           | supported     |
| - versionGet              | supported     |

##### Additional notes

Wi-Fi module SSP add-on instantiates an internal thread required for low-level Wi-Fi communication management. Internal thread stack is dynamically allocated. Stack size is defined by means of module parameter.

## 2.3. ATWINC15X0 Wi-Fi add-on component release 1.2.0-b.17

### 2.3.1 Release information

|                                   |            |
|-----------------------------------|------------|
| ATWINC1500 Wi-Fi Add-on component | 1.2.0-b.17 |
|-----------------------------------|------------|

|   |               |
|---|---------------|
| Compatible with Wi-Fi Framework Add-on versions | 1.0.0-b.3     |
| Compatible with SSP versions                    | 1.2.0         |
| Release Date                                    | Jun. 23, 2017 |

## 2.3.2 Release package supported APIs and functionalities

### 2.3.2.1 Synergy Wi-Fi Framework with NetX

#### Supported API list

|                       |               |
|-----------------------|---------------|
| - open                | supported     |
| - close               | supported     |
| - multicastListAdd    | NOT supported |
| - multicastListDelete | NOT supported |
| - statisticsGet       | supported     |
| - transmit            | supported     |
| - provisioningSet     | supported     |
| o Station mode        | supported     |
| o AP mode             | NOT supported |
| - provisioningGet     | supported     |
| - infoGet             | supported     |
| - scan                | NOT supported |
| - ACLAdd              | NOT supported |
| - ACLDelete           | NOT supported |
| - macAddressGet       | supported     |
| - macAddressSet       | supported     |
| - versionGet          | supported     |

#### Additional notes

ATWINC1500 Wi-Fi add-on component release 1.2.0-b.17 is included into release 1.2.0 installer.

Respect to previous release, 1.2.0-b.16 version introduces support for ACLAdd and ACLDelete APIs (replacing accessControlListAdd and accessControlListDelete) in order to match official NSAL release.

### 2.3.2.2 BSD socket API

NOT supported.

## 2.4. ATWINC15X0 Wi-Fi add-on component release 1.2.0

### 2.4.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.2.0         |
| Compatible with Wi-Fi Framework Add-on versions | 1.0.0         |
| Compatible with SSP versions                    | 1.2.1         |
| Release Date                                    | Jun. 23, 2017 |

## 2.4.2 Release package supported APIs and functionalities

### 2.4.2.1 Synergy Wi-Fi Framework with NetX

#### Supported API list

|                       |               |
|-----------------------|---------------|
| - open                | supported     |
| - close               | supported     |
| - multicastListAdd    | NOT supported |
| - multicastListDelete | NOT supported |
| - statisticsGet       | supported     |
| - transmit            | supported     |
| - provisioningSet     | supported     |
| o Station mode        | supported     |
| o AP mode             | supported     |
| - provisioningGet     | supported     |
| - infoGet             | supported     |
| - scan                | supported     |
| - ACLAdd              | NOT supported |
| - ACLDelete           | NOT supported |
| - macAddressGet       | supported     |
| - macAddressSet       | supported     |
| - versionGet          | supported     |

#### Additional notes

ATWINC1500 Wi-Fi add-on component release 1.2.0 introduces support for SSP 1.2.1.

### 2.4.2.2 BSD socket API

NOT supported.

## 2.5. ATWINC15X0 Wi-Fi add-on component release 1.3.0

### 2.5.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.3.0         |
| Compatible with Wi-Fi Framework Add-on versions | 1.3.0         |
| Compatible with SSP versions                    | 1.3.0         |
| Release Date                                    | Sep. 08, 2017 |

## 2.5.2 Release package supported APIs and functionalities

### 2.5.2.1 Synergy Wi-Fi Framework with NetX

#### Supported API list

|         |           |
|---------|-----------|
| - open  | supported |
| - close | supported |

- multicastListAdd NOT supported
- multicastListDelete NOT supported
- statisticsGet supported
- transmit supported
- provisioningSet supported
- o Station mode supported
- o AP mode supported
- provisioningGet supported
- infoGet supported
- scan supported
- ACLAdd NOT supported
- ACLDelete NOT supported
- macAddressGet supported
- macAddressSet supported
- versionGet supported

### Additional notes

ATWINC1500 Wi-Fi add-on component release 1.3.0 introduces support for SSP 1.3.0. Compatibility with previous SSP 1.2.x has been removed.

#### 2.5.2.2 BSD socket API

NOT supported.

## 2.6. ATWINC15X0 Wi-Fi add-on component release 1.3.2

### 2.6.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.3.2         |
| Compatible with Wi-Fi Framework Add-on versions | 1.3.x         |
| Compatible with SSP versions                    | 1.3.x         |
| Release Date                                    | Dec. 12, 2017 |

Important notices for this release:

Existing projects (even based on ATWINC15X0 Wi-Fi add-on release 1.3.0-update1) may not migrate seamlessly to the newer 1.3.2 pack file since there are substantial changes in the modules internal naming that may break compatibility. Users are strongly advised to back up their existing projects before migrating to latest pack versions, or simply start from a newly designed project.

### 2.6.2 Release package supported APIs and functionalities

#### 2.6.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- open supported
- close supported

- multicastListAdd NOT supported
- multicastListDelete NOT supported
- statisticsGet supported
- transmit supported
- provisioningSet supported
- o Station mode supported
- o AP mode supported
- provisioningGet supported
- infoGet supported
- scan supported
- ACLAdd NOT supported
- ACLDelete NOT supported
- macAddressGet supported
- macAddressSet supported
- versionGet supported

### Additional notes

ATWINC1500 Wi-Fi add-on component release 1.3.2 supports SSP 1.3.x.

Compatibility with previous SSP 1.2.x has been removed.

#### 2.6.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.3.2 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset, and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.7. ATWINC15X0 Wi-Fi add-on component release 1.3.2-update1

### 2.7.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.3.2-update1 |
| Compatible with Wi-Fi Framework Add-on versions | 1.3.x         |
| Compatible with SSP versions                    | 1.3.x         |
| Release Date                                    | Jan. 11, 2018 |

Fixed switch between different WiFi modes (station and AP).

### 2.7.2 Release package supported APIs and functionalities

#### 2.7.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- open supported

- close supported
- multicastListAdd NOT supported
- multicastListDelete NOT supported
- statisticsGet supported
- transmit supported
- provisioningSet supported
  - o Station mode supported
  - o AP mode supported
- provisioningGet supported
- infoGet supported
- scan supported
- ACLAdd NOT supported
- ACLDelete NOT supported
- macAddressGet supported
- macAddressSet supported
- versionGet supported

### 2.7.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.3.2-update1 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset, and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.8. ATWINC15X0 Wi-Fi add-on component release 1.3.2-update2

### 2.8.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.3.2-update2 |
| Compatible with Wi-Fi Framework Add-on versions | 1.3.x         |
| Compatible with SSP versions                    | 1.3.x         |
| Release Date                                    | Mar. 6, 2018  |

Removed blocking loop into bus wrapper in case of error.

Removed forever timeouts, APIs timeouts are now configurable using the configurator.xml .

### 2.8.2 Release package supported APIs and functionalities

#### 2.8.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- open supported
- close supported
- multicastListAdd NOT supported
- multicastListDelete NOT supported
- statisticsGet supported

- transmit supported
- provisioningSet supported
  - o Station mode supported
  - o AP mode supported
- provisioningGet supported
- infoGet supported
- scan supported
- ACLAdd NOT supported
- ACLDelete NOT supported
- macAddressGet supported
- macAddressSet supported
- versionGet supported

### 2.8.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.3.2-update2 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset, and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.9. ATWINC15X0 Wi-Fi add-on component release 1.3.2-update3

### 2.9.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.3.2-update3 |
| Compatible with Wi-Fi Framework Add-on versions | 1.3.x         |
| Compatible with SSP versions                    | 1.3.x         |
| Release Date                                    | Mar. 27, 2018 |

Various fixes in the close API.

SPI Framework was opened twice, fixed.

### 2.9.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.3.2-update3 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset, and is not using NSAL (or the networking stack running on the Synergy MCU).

### 2.11.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.4.0 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset, and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.12. ATWINC15X0 Wi-Fi add-on component release 1.4.0-update2

### 2.12.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.4.0-update2 |
| Compatible with Wi-Fi Framework Add-on versions | 1.4.x         |
| Compatible with SSP versions                    | 1.4.x         |
| Release Date                                    | July 20, 2018 |

#### Change list

- Added an internal transmission queue with configurable depth. This queue will be used when:
  - o the bus is busy for a time longer than the configured timeout;
  - o the preemption is disabled (for example during a ping command).
- Fixed an IAR compiler incompatibility.

### 2.12.2 Release package supported APIs and functionalities

#### 2.12.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- |                       |               |
|-----------------------|---------------|
| - open                | supported     |
| - close               | supported     |
| - multicastListAdd    | NOT supported |
| - multicastListDelete | NOT supported |
| - statisticsGet       | supported     |
| - transmit            | supported     |
| - provisioningSet     | supported     |
| o Station mode        | supported     |
| o AP mode             | supported     |
| - provisioningGet     | supported     |
| - infoGet             | supported     |
| - scan                | supported     |
| - ACLAdd              | NOT supported |
| - ACLDelete           | NOT supported |
| - macAddressGet       | supported     |
| - macAddressSet       | supported     |
| - versionGet          | supported     |

### 2.12.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.4.0-update2 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset, and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.13. ATWINC15X0 Wi-Fi add-on component release 1.5.0-rc.1

### 2.13.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.5.0-rc.1    |
| Compatible with Wi-Fi Framework Add-on versions | 1.5.x         |
| Compatible with SSP versions                    | 1.5.x         |
| Release Date                                    | July 24, 2018 |

#### Change list

- Upgrade of pack configuration files from 1.4.0-update2 to 1.5.0-rc.1 release.

### 2.13.2 Release package supported APIs and functionalities

#### 2.13.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- |                       |               |
|-----------------------|---------------|
| - open                | supported     |

| - transmit            | supported     |
| - provisioningSet     | supported     |
| o Station mode        | supported     |
| o AP mode             | supported     |
| - provisioningGet     | supported     |
| - infoGet             | supported     |
| - scan                | supported     |
| - ACLAdd              | NOT supported |
| - ACLDelete           | NOT supported |
| - macAddressGet       | supported     |
| - macAddressSet       | supported     |
| - versionGet          | supported     |

### 2.13.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.5.0-rc.1 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset, and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.14. ATWINC15X0 Wi-Fi add-on component release 1.5.0

### 2.14.1 Release information

|   |             |
|---|-------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.5.0       |
| Compatible with Wi-Fi Framework Add-on versions | 1.5.x       |
| Compatible with SSP versions                    | 1.5.x       |
| Release Date                                    | Oct 3, 2018 |

#### Change list

- Added multicastListAdd and multicastListDelete support.

### 2.14.2 Release package supported APIs and functionalities

#### 2.14.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- |                       |               |
|-----------------------|---------------|
| - open                | supported     |
| - close               | supported     |
| - multicastListAdd    | supported     |
| - multicastListDelete | supported     |
| - statisticsGet       | supported     |
| - transmit            | supported     |
| - provisioningSet     | supported     |
| o Station mode        | supported     |
| o AP mode             | supported     |
| - provisioningGet     | supported     |
| - infoGet             | supported     |
| - scan                | supported     |
| - ACLAdd              | NOT supported |
| - ACLDelete           | NOT supported |
| - macAddressGet       | supported     |
| - macAddressSet       | supported     |
| - versionGet          | supported     |

#### 2.14.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.5.0 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.15. ATWINC15X0 Wi-Fi add-on component release 1.5.3

### 2.15.1 Release information

|   |             |
|---|-------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.5.3       |
| Compatible with Wi-Fi Framework Add-on versions | 1.5.x       |
| Compatible with SSP versions                    | 1.5.x       |
| Release Date                                    | Mar 5, 2019 |

#### Change list

- Added a retry loop in the transmit API in order to wait for winc1500 memory to get free when high throughput rates are used.
- User callback saved in AP mode too.
- Fixed events wait call in the internal thread: TX\_AND\_CLEAR option was wrongly used.
- Suppressed missing field initialization warning.

### 2.15.2 Release package supported APIs and functionalities

#### 2.15.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- |                       |               |
|-----------------------|---------------|
| - open                | supported     |
| - close               | supported     |
| - multicastListAdd    | supported     |
| - multicastListDelete | supported     |
| - statisticsGet       | supported     |
| - transmit            | supported     |
| - provisioningSet     | supported     |
| o Station mode        | supported     |
| o AP mode             | supported     |
| - provisioningGet     | supported     |
| - infoGet             | supported     |
| - scan                | supported     |
| - ACLAdd              | NOT supported |
| - ACLDelete           | NOT supported |
| - macAddressGet       | supported     |
| - macAddressSet       | supported     |
| - versionGet          | supported     |

#### 2.15.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.5.3 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.16. ATWINC15X0 Wi-Fi add-on component release 1.5.3-update1

### 2.16.1 Release information

|   |               |
|---|---------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.5.3-update1 |
| Compatible with Wi-Fi Framework Add-on versions | 1.5.x         |
| Compatible with SSP versions                    | 1.5.x         |
| Release Date                                    | Mar 28, 2019  |

#### Change list

- Modified the wifi interrupt enable/disable behavior because of the r\_icu fix for the issue ID 13680.

### 2.16.2 Release package supported APIs and functionalities

#### 2.16.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- open supported
- close supported
- multicastListAdd supported
- multicastListDelete supported
- statisticsGet supported
- transmit supported
- provisioningSet supported
  - o Station mode supported
  - o AP mode supported
- provisioningGet supported
- infoGet supported
- scan supported
- ACLAdd NOT supported
- ACLDelete NOT supported
- macAddressGet supported
- macAddressSet supported
- versionGet supported

#### 2.16.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.5.3-update1 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.17. ATWINC15X0 Wi-Fi add-on component release 1.6.0

### 2.17.1 Release information

|   |              |
|---|--------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.6.0        |
| Compatible with Wi-Fi Framework Add-on versions | 1.6.x        |
| Compatible with SSP versions                    | 1.6.x        |
| Release Date                                    | Apr 05, 2019 |

#### Change list

- Diversified connection events when in AP or in station mode.
- Fixes for compiler GNU v7.
- Fixed max SSID length (now 32 chars).

### 2.17.2 Release package supported APIs and functionalities

#### 2.17.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- |                       |               |
|-----------------------|---------------|
| - open                | supported     |
| - close               | supported     |
| - multicastListAdd    | supported     |
| - multicastListDelete | supported     |
| - statisticsGet       | supported     |
| - transmit            | supported     |
| - provisioningSet     | supported     |

| o AP mode             | supported     |
| - provisioningGet     | supported     |
| - infoGet             | supported     |
| - scan                | supported     |
| - ACLAdd              | NOT supported |
| - ACLDelete           | NOT supported |
| - macAddressGet       | supported     |
| - macAddressSet       | supported     |
| - versionGet          | supported     |

#### 2.17.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.6.0 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.18. ATWINC15X0 Wi-Fi add-on component release 1.6.2

### 2.18.1 Release information

|   |                 |
|---|-----------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.6.2           |
| Compatible with Wi-Fi Framework Add-on versions | 1.6.0 and 1.6.2 |
| Compatible with SSP versions                    | 1.6.0 and 1.6.2 |
| Release Date                                    | Jul 01, 2019    |

#### Change list

- Fixed bug for RSSI read value.

### 2.18.2 Release package supported APIs and functionalities

#### 2.18.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- open supported
- close supported
- multicastListAdd supported
- multicastListDelete supported
- statisticsGet supported
- transmit supported
- provisioningSet supported
  - o Station mode supported
  - o AP mode supported
- provisioningGet supported
- infoGet supported
- scan supported
- ACLAdd NOT supported
- ACLDelete NOT supported
- macAddressGet supported
- macAddressSet supported
- versionGet supported

#### 2.18.2.2 BSD socket API

ATWINC1500 Wi-Fi add-on component release 1.6.2 supports BSD socket APIs.

Socket APIs provide an interface to the application to make use of BSD Socket APIs. When the application uses these APIs, it is using the on-chip networking stack present on the WiFi chipset and is not using NSAL (or the networking stack running on the Synergy MCU).

## 2.19. ATWINC15X0 Wi-Fi add-on component release 1.7.0

### 2.19.1 Release information

|   |              |
|---|--------------|
| ATWINC1500 Wi-Fi Add-on component               | 1.7.0        |
| Compatible with Wi-Fi Framework Add-on versions | 1.7.0        |
| Compatible with SSP versions                    | 1.7.0        |
| Release Date                                    | Oct 08, 2019 |

#### Change list

- Fixed compilation error when “Assert Failures” is enabled in the BSP tab of the configuration.xml.
- Added timeout in the open API so that if the WINC1500 module is not connected, or is not responding, an error is returned. In the previous versions the open API waited forever for a response from the module.

### 2.19.2 Release package supported APIs and functionalities

#### 2.19.2.1 Synergy Wi-Fi Framework with NetX

##### Supported API list

- |                       |               |
|-----------------------|---------------|
| - open                | supported     |
